EXPERIENCE

- Systems Analyst — Grupo Platino**
November 2024 – May 2026

San Pedro Sula, Honduras

 - Developed custom solutions in SAP Business One using the SDK and Service Layer, including automated exchange rate management for more than 13 companies within the group, eliminating daily manual entry and ensuring zero accounting errors.
 - Built and implemented automated ETL workflows in SQL Server, centralizing data from SAP Business One, CRM, and Jotform, eliminating more than 15 hours of manual data consolidation work per week.
 - Designed and implemented management dashboards in Power BI and operational reports in Crystal Reports, eliminating reliance on manual Excel reports and enabling real-time data visibility.
- IT Manager — Grupo IB**
September 2023 – November 2024

San Pedro Sula, Honduras

 - Ensured regional operational stability by leading the IT department and centrally administering SAP Business One across 3 countries (Honduras, Nicaragua, and Costa Rica), aligning business objectives with direct technical support.
 - Led process improvement and automation projects, including SAP Business One optimizations and the implementation of payroll systems for HR, reducing manual tasks and improving operational efficiency.
 - Ensured high availability and business continuity for critical operations by overseeing and maintaining network infrastructure, servers, and switches across 11 local customs offices, providing continuous technical support to users.
 - Improved technology resource allocation and operational stability through IT budget management, strategic vendor negotiations, and leadership of regional technical staff.
- ERP Regional Lead / IT Lead — GRS Electrodomésticos**
April 2021 – August 2023

San Pedro Sula, Honduras

 - Ensured ERP operational continuity and stability across Central America through the regional administration and optimization of SAP Business One, ensuring seamless integration across key business departments.
 - Oversaw IT operations in Honduras, including infrastructure, technical support, and vendor management, ensuring the continuity and reliability of technology services.
 - Aligned technology initiatives with the company's financial and commercial objectives by leading cross-functional IT/ERP projects in direct collaboration with Finance, Logistics, Sales, Marketing, and HR.
 - Improved data accuracy and analytical performance by designing and managing ETL processes and SQL solutions across SAP HANA, SQL Server, and MySQL, while overseeing the technical operations of regional e-commerce platforms (Shopify and WordPress).
- Applications Developer — Seaboard Solutions**
October 2019 – July 2020

San Pedro Sula, Honduras

 - Automated and optimized internal operational workflows by developing enterprise web applications using ASP.NET MVC, C#, LINQ, and SQL Server.
 - Reduced the learning curve and improved the user experience (UX/UI) by designing efficient web solutions with Kendo UI and creating prototypes in Figma.
 - Managed development projects using JIRA, planning tasks and sprints to ensure project objectives were met.
